Interactive Adventure Game

## Please follow the instructions below for Android Version 11

1. SWIPE DOWN on your home screen, there is an icon that shows if Location is turned on - if not TURN ON by clicking on it...

Next you need to give location permissions for your Browser

- Open Settings and find Location
- 3. App Permissions

set that to While Using.

4. Select your Browser App from the list of Apps and turn on permission.

Depending on which Android phone you have, this process might be slightly different, you can check your mobile device is set up correctly by trying our sample hunt at https://www.huntfun.co.uk/CorporateGPS/get\_geo\_location2.html
